

# playNETic

AUSTRALIA playing with energy

This playful Ball is super sustainable, because by turning the hand crank children will generate energy by themselves!

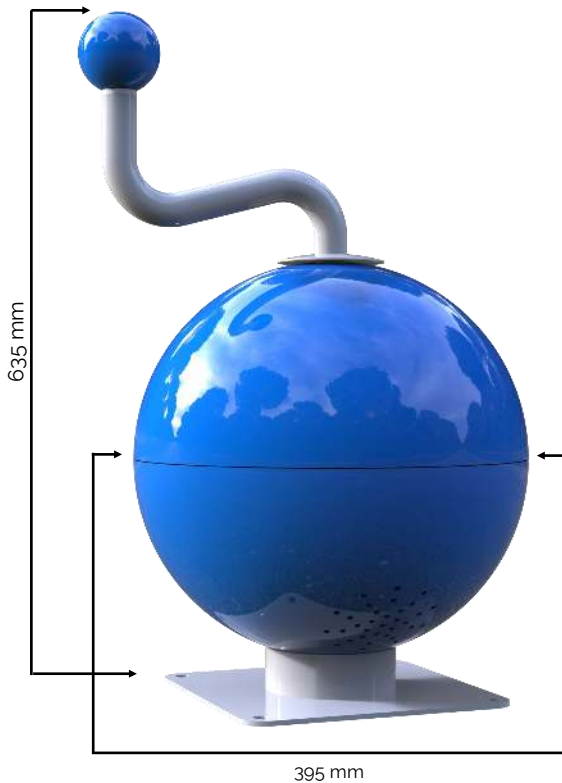

After you turn the crank, the StoryBall will read aloud well-known children's stories, so everyone can enjoy.

By listening the imagination will be activated. Fantasy makes flexible thinking possible, which creates an imagination.

Imagination is the basis for inspiration, new ideas and development.

Please note:

The StoryBall is available in different colours  
The USB stick determines whether you purchase a MusicBall or StoryBall
