

PLAYNETIC

AUSTRALIA playing with energy

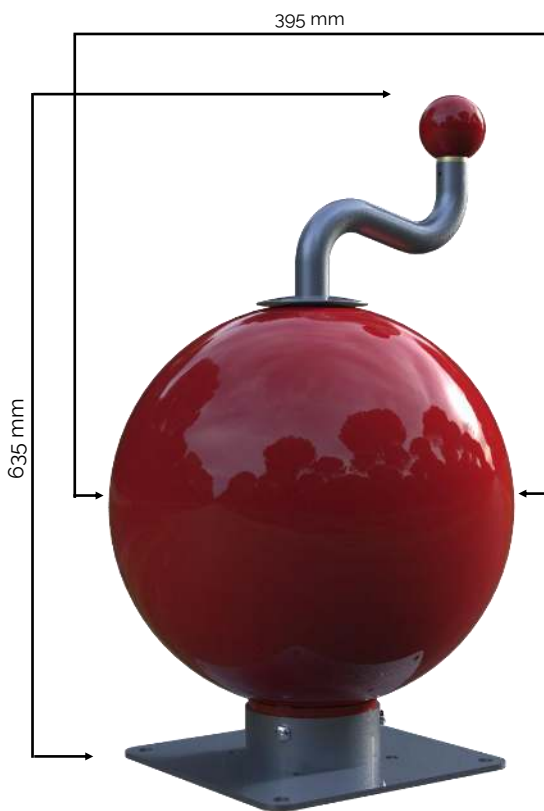

This playful Ball is super sustainable, because by turning the hand crank children will generate energy by themselves!

After you turn the crank, the MusicBall will play well-known children's songs, so everyone can sing along. Music helps the development of physical, emotional, social and cognitive skills.

The MusicBall will make you want to dance and sing, so it's a cheerful way to simulate children's development.

Please note:

The MusicBall is available in different colours
The USB stick determines whether you purchase a MusicBall or StoryBall
